[Servicio Nacional de Aprendizaje \(SENA\)](#)

📅 01/2024 - 12/2024

Self-taught education

[I learn by myself, There is no better education than the one you give yourself.](#)

📅 2023 - 2025

PROJECTS

DATAFAST

DataFast is a system designed to optimize inventory management and facilitate product control in companies of all sizes. It improves efficiency and reduces operation time.

<https://github.com/CesarMartinez7/DataFast/tree/tailwind>

DELFIIMS

Delfiims is a free streaming platform with a wide selection of movies and series. Without subscriptions or annoying ads, it offers simple and cost-free access for movie lovers. <https://delfiims.pages.dev/>

CATCHYBOT

This is a Telegram bot developed in Python that allows you to download music from YouTube directly from a chat. Simply send a video link, and the bot will convert it to audio and send it to you in seconds.

MEKO

Meko is a platform focused on anime streaming, with an updated catalog and a smooth interface. Find and enjoy your favorite series without complications. <https://mekoo.pages.dev>

DEXTS

DexTS provides detailed information about anime and manga using GraphQL to fetch real-time data. Find synopses, characters, and more in one place, plus watch anime and read manga!. <https://dexts.pages.dev>

MERCADO LIBRE CLON

A clone of Mercado Libre developed with Next.js, React, and Tailwind CSS. It replicates the shopping experience with advanced search and responsive design. <https://mercadoesclavo.vercel.app>
